

# Author guidelines for preparing extended abstracts for the IAMOT 2024 Conference<sup>\*</sup>

First Author<sup>1</sup>[0000–1111–2222–3333] and Second Author<sup>2,3</sup>[1111–2222–3333–4444]

<sup>1</sup> INESC TEC, Porto, Portugal

<sup>2</sup> University of Porto, Faculty of Engineering, Porto, Portugal [lncs@springer.com](mailto:lncs@springer.com)  
<http://www.springer.com/gp/computer-science/lncs>

**Abstract.** The abstract is a mandatory element that should summarize the contents of the paper and should contain at least 70 and at most 150 words. Abstract and keywords are freely available in SpringerLink.

**Keywords:** First keyword · Another keyword · Up to five keywords

## 1 First Section

### 1.1 A Subsection Sample

Please note that the first paragraph of a section or subsection is not indented. The first paragraph that follows a table, figure, equation etc. does not need an indent, either.

Subsequent paragraphs, however, are indented. The maximum number of words for the extended abstract is 1000, including references. Displayed equations are centered and set on a separate line.

$$x + y = z \tag{1}$$

For citations of references, we prefer the use of square brackets and consecutive numbers. Citations using labels or the author/year convention are also acceptable. The following bibliography provides a sample reference list with entries for journal articles [1], an LNCS chapter [2], a book [3], proceedings without editors [4], and a homepage [5]. Multiple citations are grouped [1–3], [1, 3–5].
